## 1969-1970

Chico High School
Chico, Texas

# *Superintendent's Message*

Thanks to the annual staff for the hard work and untiring effort you have spent in editing this fine year book.

To you graduating seniors, may I commend you for your many fine accomplishments during the year. Some of you have had as fine a year as could be expected and many honors have come your way. For this, I know you are grateful.

To you students returning next year, continue the good work. May you excel in your own rights and privileges, the accomplishments of those students who are leaving.

Sincerely yours,

R. L. Huffman

R. L. Huffman

# *Principal's Message*

I extend my congratulations to the Annual Staff for this documented pictorial history of the 1969-70 school year. Your devotion and efforts have given the faculty and student body of Chico Schools a collection of exciting moments, friends, and classmates which we will cherish for years to come.

You, the faculty and student body of Chico High School are to be commended for your untiring devotion to Chico Schools. Your cooperation, understanding and participation tenders the spirit of OUR School instead of Chico Independent Schools.

Seniors, Congratulations! Our thoughts will be with you. Your successes and achievements will be anticipated and glorified in the hallowed halls of Chico High.

Sincerely,

Billy J. McKinnerney

# Dedication

It is with honest sincerity that we, the annual staff of 1969-1970, dedicate this, our yearbook, to Mrs. Gay Culbertson. We are indeed grateful to her for the many wonderful things she has done for us. It would be difficult to show all our heartfelt appreciation for her kindness and thoughtfulness.

# If there's a better way, we'll find it.

Thomas A. Edison, the research genius of his time, found a "better way" of life for the world when he first put electricity to use. Later, research by the electric industry and companies like Texas Power & Light Company created hundreds of new conveniences for home, industry and farm. And the future seems limitless. TP&L, in cooperation with other electric utilities, universities and the electric industry, has carried on a number of research programs spanning a wide variety of fields—from exploring the possibilities of converting heat and chemical energy directly into electricity, to developing a vastly improved design for electric water heaters and taking a part in nuclear study, research and development programs. If there's a better way, we'll find it!
